

Deferol[™]
All Natural Climax Control Supplement for Men

M a x i m i z e y o u r c o n t r o l

Finally... a natural way to end premature climax.

Get Deferol™ and get in control

As many as 60% of men have intermittent concerns about sex ending too quickly. Women are just as concerned, if not more so. No man wants to admit it, but finishing too fast is a common problem. Now men can last longer naturally and improve their sexual ability. Deferol Climax Control Supplement is an all-natural, clinically tested supplement that allows men greater climax control. Men don't have to experience a problem to enjoy the benefits of Deferol. It can also be taken by men who simply wish to have greater control and last longer during sex. Deferol puts the man in control of his orgasm rather than the orgasm controlling the man.

A new discovery in Sexual Research

Taken on a daily basis and before sexual activity, Deferol lowers anxiety, reduces the ejaculatory urge and increases climax control by modulating serotonin in the central nervous system as well as activating anti-anxiety mechanisms. Deferol simply and naturally allows men to relax and control their climax. It lets couples discover the joys of longer lasting lovemaking and increased sexual satisfaction.

Why Deferol™?

Premature climax is the most prevalent of male sexual problems. However, relatively few men seek treatment. Currently, there is no FDA-approved prescription treatment for Premature Climax. There are several existing options for dealing with Climax Control problems, such as anesthetic creams, prescription antidepressants and a few manual methods, but they all come with drawbacks and in some cases serious side effects. Deferol is the only natural non-prescription approach for men that works on the same effective scientific principles as prescription drugs used for climax control.

Deferol Benefits:

- Provides greater control of climax
- Increases confidence in sexual ability
 - Makes sex more satisfying and last longer
 - Reduces frustration and disappointment
 - Improves sex life dramatically

*The Only All-Natural
Climax Control Supplement
For Men*

Deferol™ Climax Control Supplement

Description: Deferol capsules are a dietary supplement for men that helps promote longer lasting, more satisfying sexual activity.*

Ingredients and Pharmacology: Deferol is a proprietary blend of the following ingredients that are classified under F.D.A. regulations as dietary supplements:

Griffonia seed extract: Griffonia seed extract is a rich source of 5-HTP. 5-HTP is a compound that occurs naturally in food in small amounts. Our bodies also form 5-HTP from the foods we eat. Milk and meats (especially turkey) are some of the food the body uses to form 5-HTP. In the body, 5-HTP converts to its active form called serotonin, which reduces the ejaculatory urge.

Passiflora coerulea plant extract: The Passiflora coerulea plant is a source of a food component called Chrysin. Chrysin is a natural product present in small amounts in our daily diet, especially in fruit juices, namely grapefruit juice. In numerous scientific studies, Chrysin has been shown to have specific anti-anxiety effects.

Vitamin compounds: Vitamin B6 (Pyridoxine HCl) and Pyridoxal 5-phosphate (active form of Vitamin B6) are enzymatic co-factors for maximum conversion of 5-HTP to its active form (serotonin). Vitamin B9 (Folic Acid) has been scientifically correlated with proper functioning of the serotonin system.

Actions: Deferol is a specific blend of ingredients that synergistically work together to effectively allow for greater climax control by modulating serotonin in the central nervous system and activating anti-anxiety mechanisms.

Directions: Take 1 Deferol capsule every day as a dietary supplement. For best results, also take an additional one or two capsules one to two hours prior to activity.

Recommended use: Deferol allows a man to have greater control over his orgasm and extends time to climax in most any situation. Deferol is used by men who climax prematurely. Additionally, men who do not climax prematurely also benefit from Deferol by enhancing the quality of sexual activity and extending intercourse time.

Adverse effects: No negative side effects have been reported. Some positive side effects such as a more relaxed or calm feeling or mild drowsiness may occur. High doses may cause gastrointestinal upset.

Warnings: This product may cause drowsiness. Alcohol, sedatives, or tranquilizers may increase the drowsiness effect. Use caution when driving a motor vehicle or operating machinery.

Drug interactions: No specific drug interactions have been observed with Deferol. However, potential drug interactions do exist with prescription anti-depressants of the SSRI – type, some atypical anti-depressants, tricyclic anti-depressants, and monoamine oxidase inhibitors. Consult your physician.

Quality assurance: Deferol is manufactured from both pharmaceutical grade and U.S.P. ingredients (99% + pure) in FDA approved manufacturing facilities complying with current U.S. Pharmacopoeia standards.

Results guaranteed or full refund.
